

# Asus ROG Gladius 2 Ergonomic Optical Wired Gaming Mouse - Black

Arm yourself and take aim with the ROG Gladius II optical gaming mouse, the successor to the original Gladius and the next step in the evolution of the ultimate gaming mouse. The Gladius II has an advanced 12000 DPI optical sensor and DPI target button for maximum sniping accuracy – your enemies can run, but they can't hide. And with ASUS Aura Sync lighting technology, you'll outshine the competition. Key Features Ergonomically Designed for All Grip Types From the very start, pro gamers have had a hand in designing the ROG Gladius II. The result is an extremely comfortable, high-performance mouse that's perfect for all gamers and any grip styles. Dominate and Illuminate ROG Gladius II is designed to dominate – and it looks the part with aggressive aesthetics and ASUS Aura RGB lighting technology. With six customizable pre-set light effects and incredible performance, the Gladius II is primed for battle! Perfect Synchronization Achieve perfect RGB lighting synchronization across your ROG Gladius II and other Aura Sync-enabled products to complete the look of your battle station. ROG Sync enables quick lighting synchronization between ROG Claymore and Gladius II, or Aura Sync with ASUS motherboards and other components for a system that really shines! Dedicated DPI Target Button Whether you're camping out in a sniper nest or hunting down the enemy, the DPI target

button is your best ally. You can switch sensitivity settings simply by holding down the DPI target button, which lowers the DPI for more accurate sniping or raises it for faster scrolling across the screen. Default DPI settings return as soon as the button is released. Exclusive Push-Fit Switch Socket Design ROG Gladius II features an exclusive push-fit socket design that allows you to easily change switches, so you can vary click resistance or extend the lifespan of the mouse by replacing worn or broken switches. Durable 50-Million-Click Switches Mouse buttons and switches – especially switches on gaming mice – take the most abuse. Manufactured with high-quality Omron mouse switches that are rated to at least 50 million clicks, ROG Gladius II is built to last. Advanced Optical Sensor Every strike is critical. At the heart of ROG Gladius II is an optical sensor that provides you with the accuracy and precision needed to take down the opposition. \*image are for illustration purpose only

## Features
