

Fujifilm Instax Mini Link Aloha Smartphone Printer - Dusty Pink

Fujifilm's Instax Mini Link Smartphone Printer comes with a sleek and light body design, revamped app, fun social features, and Bluetooth capability. Its user-friendly free downloadable app gives you around 30 fun and colorful frames to customize your photos or create collage and split prints. The app also lets you print photos from videos. With all these fun-filled features, the Instax Mini Link Smartphone Printer is sure to grab your attention. Key Features Transferring pictures from a smartphone to the printer with a dedicated app via Bluetooth connection to produce instax prints The app allows easy photo adjustments, such as making it larger / smaller, rotating it, applying a filter or adjusting brightness, before printing it out. The printer has fast speed of about 12 seconds per print, supports continuous printing and is capable of printing about 100 pictures per charge. "Video Print" function for printing the best frame from video You can scroll through video frames left to right to choose the best moment for your subject, and print it out. "Match Test" compatibility testing function, which shows the result when the picture appears on the film This function examines your compatibility with a friend or someone special. The level of compatibility is shown in percentage. It provides a moment of anticipation while you wait for the test result to appear along with the picture on the film. "Party Print" function to create single

picture with photos sent from multiple people This function connects up to five smartphones to the app, receives a picture from each of the devices and combines them into one instax print. Using the printer's main unit as a remote control When taking pictures from the printer's dedicated app on your smartphone, you can use the Link's main unit to remotely control the camera operation. *image are for illustration purposes only
