

Blueair 103598 Joy S Pre- Filter - Saffron Red

At Blueair, we go to any length to increase cleaning efficiency – even if it means putting spandex on our air purifiers. The fabric pre-filter catches larger particles, extending the life of the main filter. Just vacuum it or put it in your washing machine when it needs cleaning.

Key Features Stretch it out now At Blueair, we go to great lengths to increase cleaning efficiency – even if it means putting spandex on our air purifiers. Our colorful Blueair JOY S fabric pre-filters catch larger particles thereby extending the life of the main filter. Just gently vacuum the pre-filter or put it in your washing machine whenever it needs cleaning. Three times more colorful than your average air purifier Instead of making our Blueair JOY S Pre-Filter in only one color, you can choose from three vibrant fabrics. That's way more fun. Match your personality or redecorate your room. Or buy all three and change colors according to your mood? All it takes is a few seconds! *Images are for illustration purposes only.
