

Cado Leaf AP-C320i-CG Air Purifier - Cool Gray

Cado air purifier reduces formaldehyde emitted by paint, furniture and similar items, as well as methanethiol and ammonia, which carry odor, to practically zero in one hour. At least 99.9% of viruses, molds and bacteria are eliminated in just 20 minutes. Key Features Link with a device that has the “cado sync app” installed via Wi-Fi to enable air condition confirmation and remote operation from the outside. The installed mixed flow fan powerfully blows the air sucked from the entire 360 degrees. High purification speed is achieved by circulating a large amount of indoor air quickly. The filter itself has a "self-cleaning function", and air is filtered step by step with a "high performance filter". The amount of air released has been increased by narrowing the edge of the top surface to the limit, enhancing the air circulation efficiency. An easy-to-understand operation panel is arranged at the edge, and functionality is packed in a minimal design. Visually communicates the “condition” of invisible air with three-color LEDs. In addition, the light intensity of the LED decreases according to the brightness of the surroundings, so it is safe to sleep. *image are for illustration purpose only

Features

General

Brand Cado

Model	AP-C320i-CG
Product Type	Air Purifiers

Dimensions

Weight (kg)	6.4
Product Height (cm)	65.2cm
Product Width (cm)	24.2cm
Product Depth (cm)	24.2cm
