

# Dyson Pure Cool Air Purifier Tower Fan TP04 - White/Silver

Designed to clean an entire room efficiently, the Dyson TP04 Purifying Tower Fan is able to sense pollution events automatically, capture ultrafine pollutants and project cleaner air using the Air Multiplier™ technology. It oscillates up to 350°, ensuring purified air is delivered to every corner of the room. The AHAM AC1-2015 standard sets out how air cleaner manufacturers can define their performance by “the relative reduction of particulate matter suspended in the air in a specified test chamber”. This means their performance is based on cleaning efficiency rates only. We design our purifying fans to go beyond test chamber conditions and focus on real home conditions – this is more than just having an efficient filter. When Dyson engineers set out to design a purifying fan, their research concluded that to clean a whole room properly, you also need to sense pollution events automatically; capture ultrafine pollutants; and project cleaner air around the room using Air Multiplier™ technology. The Dyson purifying fan is designed and tested to do all of this.<sup>1</sup> <sup>1</sup>Tested to Dyson internal test method TM-00003711 in a 27m<sup>2</sup> room. 'Harmful' / 'Ultrafine' pollutants refers to airborne particles as small as 0.1 microns (tested to EN1822). Dyson purifying fans sense and capture pollution, then project purified air throughout your whole room <sup>2</sup> . <sup>2</sup> Tested to Dyson internal test method TM-00003711 in a 27m<sup>2</sup> room. 'Harmful' / 'Ultrafine' pollutants refers to airborne particles as small as 0.1 microns (tested to EN1822).

Features

General

Brand	Dyson
Model	TP04
Product Type	Tower Fans

Dimensions

Length	11.7 cm
Weight (kg)	4.94
Product Height (cm)	105.4cm
Product Width (cm)	20.6cm
