

Ariston NIG 720 B Induction Hob - Black

Rather than using heating elements under the glass to heat the pan, induction actually heats the base of the pan. The copper coil underneath the vitroceramic surface creates an electromagnetic field which is captured by the steel base pot and heats the pot bottom directly, thus cooking the food placed inside it in a very effective way.

Key Features

- Energy saving** Faster energy efficient cooking save up to 90%* energy.
- Touch control** With just one simple touch, you can select the temperature and function precisely and independently for each cooking zone. The front position of the controls make it more easier to use.
- Pan detection** The plate only comes on when it comes into contact with the pan while the rest of the surface remains cold.
- Timer** You can set automatically switch on and off all the zones by setting the timer up to 99 minutes.
- Easy to clean** Thanks to the fact that the actual electric plates remain cold during cooking, the induction hobs can be cleaned extremely easily and safely. Without the slightest risk of burning your hands, a damp cloth is all you need to eliminate old or fresh food residues. Plus, the treated hob is immune to scratches: even when sliding saucepans, you'll never risk damaging your hob.

Schott Ceran® glass SCHOTT CERAN® glass is the only ceramic glass tops produced without the use of heavy metal arsenic and antimony, yet helps you contribute to environmental protection. Heat is conducted evenly and directly onto the pan surface, while the unheated surface on the cooker remains relatively cool.

Effortless installation Freely choose from an easy built-in to simple table top installation added convenience. The 13A plug

means no waiting, just plug and cooking for instant satisfaction. *image are for illustration purposes only

Features

General

Brand	Ariston
Model	NIG 720 B
