

Fisher & Paykel 90cm Electric Cooktop - Ceramic glass

Large cooking area with five zones including two dual elements. High speed ribbon elements that heat up quickly for ideal heat distribution. Indicator lights glow red until elements are safe to touch

Key Features

- Even heating
- Powerful ribbon elements heat up quickly and create an even distribution of heat for perfect results whether you're searing meat or simmering sauces.
- Easy to clean
- With its strong ceramic surface, your electric cooktop is designed to look shiny and new for years to come. It just needs a quick wipe after cooking – saving you time in the kitchen.
- Safe and sound
- Once your cooktop is turned off, indicator lights glow until the surface is safe to touch.

Sized to suit Fisher & Paykel electric cooktops come in a range of sizes to suit every kind of kitchen. Because they're perfectly flat and cool down fast, they can be used as an extension of your preparation surface when they're switched off. Simple to use

Classic dial controls make this cooktop a breeze to use. No complicated buttons or switches – just turn your dial to the desired temperature and you're ready to cook. Designed to match

The electric ceramic series is designed to match the rest of Fisher & Paykel's kitchen appliance family, with a stylish frameless design, sleek ceramic glass surface and intuitive controls. *image are for illustration purposes only
