

Breville BES878 Barista Pro Espresso Machine - Stainless Steel

Breville's focus on user experience shines through with the new Breville Barista Pro. A strong update to the renowned Barista Express, the Barista Pro brings better usability in a sleek and shiny new case. At the center of the new 'pro' moniker lies Breville's new ThermoJet heating system. Heat-up time is greatly improved over their earlier machines—greatly reducing the delay between brewing and steaming. This improved workflow moves you from shot prep to latte art faster than any machine at its price point.

Key Features

- Built-in Grinder** - The Barista Pro's built-in grinder helps keep your countertop cafe contained in a small, single package.
- ThermoJet Heating Element** - Significantly faster to heat than Breville's older thermocoil design, steaming is now almost instantaneous.
- Digital Control** - A backlit digital display gives you clear control over grind size, time, shots and menu settings.
- Programmable Shot Control** - Program shots volumetrically for accurate espresso, every time.
- Convenient Baskets** - The Barista Pro includes both pressurized and non-pressurized baskets—making it useable for novices and enthusiasts alike.
- Hot Water Spout** - An angled hot water spout dispenses directly into the cup for on-demand tea or americanos.
