

# Nikon MONARCH 5 8X56 Binocular - Black

Even with an uncontested heritage of all-conditions optical performance, the all-new 56mm objective MONARCH 5 further elevates its game with massive 56mm objectives and advanced low light brilliance. Nikon's ED glass lenses put it in a class of its own for battling darkness with sharp, high-contrast views. Long eye relief and tripod adaptable further its versatility. Key Features All MONARCH 5 binoculars are now built with Nikon's legendary ED (Extra-low Dispersion) glass lenses, which correct chromatic aberrations across the furthest limits of the visible light range and effectively compensate for color fringing. Even when observing objects that would make chromatic aberration the most apparent – such as adjacent whites and blacks – the images will maintain superior contrast and resolution thanks to the ED glass lenses. The improved resolution also provides brighter, more natural looking images, making the MONARCH 5 a serious contender to be your “go-to” binocular for years to come. Nikon has manufactured the MONARCH 5 binoculars, as well as many other of its optics, with a high-eyepoint design. This provides a clear field of view for everyone, even when the user is wearing eyeglasses, with sufficient space between the user's eye and the eyepiece lenses. Multilayer coatings, which provide an even higher light transmittance across the entire visible light spectrum, are applied to all of the lens and prism surfaces that transmit light. This minimizes the loss of light due to reflection, thereby ensuring a more natural, clearer view. This technique boosts light reflectivity for the full

visible range, which provides clearer whites and a sharper, brighter, and more natural vision across the entire field of view. The turn-and-slide rubber eyecups allow users to adjust the eye-relief for a custom fit - providing a full field of view and maximum comfort during extended periods of use. Built to handle any environment, the MONARCH 5 has a rubber-armored coating to withstand extreme use and provide a non-slip grip, even in the wettest conditions. Excludes lost or stolen products and intentionally caused damage, and also excludes Nikon Rangefinders, Reflex Sights, Red Dot Sights, StabilEyes Binoculars & Specialty Optics. This intuitive design allows fast, detailed focus on subjects close-in or at a distance. MONARCH 5 binoculars are Nitrogen filled and O-Ring sealed for complete waterproof and fogproof performance. \*image are for illustration purposes only

## Features

### Dimensions

<b>Brand</b>	Nikon
<b>Model</b>	MONARCH 5 8X56 (M511)
<b>Product Type</b>	Binoculars
<b>Length</b>	19.812cm
<b>Product Width (cm)</b>	14.48cm
