

Canon EOS 5D Mark IV DSLR Camera with EF 24-105mm Lens Kit

With over 10 years of achieving perfection, Canon introduces the next powerhouse in photography, the Canon EOS 5D Mark IV. Boasting an all new 30.4 megapixel CMOS sensor, DCI 4K shooting and an advanced DIGIC 6+ imaging processor and a handful of fresh features and technologies, the 5D Mark IV ensures that you can capture and record shots that are a visual treat. Stunningly Detailed The Canon EOS 5D Mark IV's all new 30.4 megapixel CMOS sensor ensures that your images crisp and clear. With a 61-Point High Density Reticular AF II system with 41 cross-type auto focus points you can cover an expanded area in your shots to allow for an incredible amount of flexibility and control. Light, Dark and Inbetween Featuring an ISO range of 100 -32000 (which is expandable from 50 – 102400), the 5D Mark IV utilizes improved noise processing algorithms to help improve low light shooting. A 150,000 Pixel RGB+IR metering sensor ensures that no matter what lighting conditions you are shooting under, your images will be correctly exposed. Fast, Powerful, Innovative An advanced DIGIC 6+ imaging processor helps the 5D Mark IV produce incredibly fast performance while retaining intuitive operation. Coupled with a 3.2" LCD ClearView touchscreen interface which lets you change settings, select focus points and review images, you get a camera that is powerful yet user friendly. A Visual Treat With EOS Movie 4K+ Full HD video capabilities, the 5D Mark IV enables DCI 4K video recording at up to 30 frames per second allowing you to direct stunning

professional like videos. The Mark IV also grants you the ability to take still 8.8MP JPEG images from your 4K videos. Don't Miss A Thing The EOS Mark IV features the ability to continuously shoot high speed shots at up to 7 frames per second while maintaining auto focus performance. This means that not only will you be able to confidently capture fast moving action, you'll be able to capture them in clear precise detail. Docking Convenience The EOS 5D Mark IV comes with Wi-Fi and NFC as standard, enabling you to easily upload and show off your stunning shots to your favourite social media platforms. With the Canon Camera Connect App* you can wirelessly shoot your photos from your compatible smartphone, allowing you to compose, zoom in and out, focus and more.
